SECOND INFORMATION DISCLOSURE STATEMENT  
UNDER 37 C.F.R. §§1.97 and 1.98

Assistant Commissioner for  
Patents  
Washington, D.C. 20231

Sir:

CERTIFICATE OF MAILING 37 C.F.R. 1.8	
I hereby certify that this correspondence is being deposited with the U.S. Postal Service as First Class Mail in an envelope addressed to: Assistant Commissioner for Patents, Washington, D.C. 20231, on the date below:	
3/8/99	James M. Ahlana
Date	Signature

In compliance with the duty of disclosure under 37 C.F.R. §1.56, it is respectfully requested that this Information Disclosure Statement be entered and the references listed on attached Form PTO-1449 be considered by the Examiner and made of record.

The listed U.S. patent documents are patents issued to Applicants' assignee, most of which were cited in the prior Information Disclosure Statement as "copending applications."

In accordance with 37 C.F.R. § 1.98(d), copies of those references not already of record or cited by the Examiner in a parent application are enclosed.

On September 4, 1998 Cummins-Allison Corporation ("Cummins"), the assignee of U.S. Pat. No. 5,692,067, sued Glory U.S.A., Inc. ("Glory") in the Western Division of the United States District Court for the Northern District of Illinois, Civil Action No. 98 C 50292, for infringing U.S. Pat. Nos. 5,692,067 and 5,790,697. This case was subsequently transferred to the Eastern Division of the United States District Court for the Northern District of Illinois where it is currently pending as Civil Action No. 98 C 6673. This case is listed on the attached PTO-1449 Form as "Cummins-Allison Corp. v. Glory U.S.A., Inc., N.D. Ill." under the designation H22.

During this litigation, Glory brought the documents designated H1, H5, H13, H15, and H18 on the attached PTO-1449 Form to Cummins' attention. These documents are enclosed. The translations of these documents as provided by Glory are also enclosed and are designated H7, H12, H17, and H20 on the attached PTO-1449 Form. Translations of these documents obtained by Cummins are enclosed and designated as H6, H11, H14, H16 and H19 on the attached PTO-1449. Additional documents and their translations are enclosed and designated as H2-H4 and H8-H10 on the attached PTO-1449 Form.

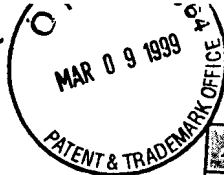

Japanese documents H1-H4 appear to relate to similar devices. Applicants believe these documents purport to disclose a currency discriminator having two destinations for documents processed. For example, page 7 of H6 states:

The control circuit also has a wrong denomination paper currency discharge unit 123. If a mismatch is indicated by the collation signals RF from the denomination collation unit 114, the detected note of paper currency is not conveyed to the paper currency collection unit 23 but may be discharged from a discharge slot.

See also H8, p.8; H9, p.24; and H10, p.8. Compare with page 12 of H7 (Glory's translation). Accordingly, the wrong denomination paper currency discharge unit 123 is capable of routing bills to a discharge slot instead of the paper currency collection unit 23. See also the middle of page 11 of H6 and the last two sentences of the first paragraph on page 13 of H6. Likewise, see H8, pp. 11 and 13; H9, pp. 27 and 29; and H10, pp. 12 and 14. Compare with H7, pages 18-19 and 22. In this regard, documents H1-H4 appear to be similar to the multiple output receptacle device of U.S. Patent No. 4,179,685 to O'Maley.

The applicants would like to make the Examiner aware of the following pending applications that are being pursued by the assignee of the present application:
